Weekly Journal for Breadstuffs Managers

1984 MILLING DIRECTORY/BUYER'S GUIDE

This 1984 Milling Directory/Buyer's Guide comprises two sections. The first is a continuation of the Directory of Milling which had its beginnings more than half a century ago and has been published by *Milling & Baking News* since 1973. The second is a Buyer's Guide of milling equipment and services, first published as a separate directory by *Milling & Baking News* in 1978.

The Milling Directory provides a comprehensive listing of companies and products in the milling industry, including daily flour milling and storage capacity, railroad service, executives in management and production, and wholesale and retail brands. The statistical summaries beginning on Page 6 detail milling capacity by largest companies, by states and by type of flour. An alphabetical listing of milling companies begins on Page 76; an alphabetical listing of milling executives begins on Page 121.

The Buyer's Guide includes a complete listing of products and services for milling and an alphabetical list of companies producing and/or supplying these products to milling. Suggestions on how to use the Buyer's Guide appear on Page 83.

This Milling Directory/Buyer's Guide is unique in that each and every listing is verified by the companies listed for accuracy. Every effort has been made to present a publication free of errors and/or omissions. In the event that errors or omissions occur, the editors of *Milling & Baking News* would greatly appreciate communications to that effect so that corrections will be made in future editions.

UNITED STATES
Statistical Summaries

The 1984 Milling Directory of *Milling & Baking News* lists a total of 237 U.S. wheat flour mills, 16 durum mills and 10 rye mills. The wheat flour mills have total daily milling capacity of 1,091,806 cwts. This aggregate includes 775,631 cwts of hard wheat flour, 271,951 cwts of soft wheat flour, 27,600 cwts of whole wheat flour and 16,624 cwts of applicable alternating capacity. Alternating capacity is shown in parentheses in the table below. Daily durum milling capacity listed in the directory is 82,400 cwts, with an additional 10,200 cwts of durum capacity alternating with wheat flour. Combining the wheat flour milling capacity of 1,091,806 cwts and the durum milling capacity of 82,400 cwts results in a wheat flour-durum aggregate of 1,174,206 cwts. Adding the 9,054 cwts of rye flour milling capacity in the directory brings aggregate of wheat flour-durum-rye capacity to 1,183,260 cwts.

Under construction: 3,000 cwts wheat flour at Indiantown, Florida.

THE BIRKETT MILLS

163 Main Street, Penn Yan, New York. 14527. Phone (315) 536-3311.

THE AGRICHEM TROUBLE-SHOOTER

PHIL SCHAMBERGER — PRESIDENT

Last seen traveling through Africa, the Orient, South America, the Caribbean... and now the United States. He is bringing with him a wealth of experience.

His specialty is improving your flour quality with optional contracts or direct purchase...the choice is yours. He can also help with that occasional problem of inferior wheat.

AgriChem, Inc. is a leading exporter and supplier of flour additives, including:

AGRIMALT (Fungal Amylase)
MATURAG (Maturing Agent)
VITAG (Vitamin Enrichment)
BROMAG & BROMAG 50 (Potassium Bromate-23-50%)
AGRILITE (Bleach)
AGRICOM (Custom Blended Combinations) also available:
GLUTEN PLUS & MODIFIED GLUTEN

He can also handle your infestation problems by supplying fumigants or help you design a complete program, including training your personel.

Call the AgriChem Trouble-Shooter today for all of your flour improvement or fumigation needs. Ask us about our *new* Agri-Chem ingredient feeder as displayed at the AOM show.

CONTACT US:

AgriChem, Inc.

755 New York Avenue • Huntington, New York 11743 U.S.A.
Telephone: 516/549-4260 TELEX 22 1678 AGRI UR

U.S. Multiple Mills...

Total wheat flour capacity: 800 cwts; **total buckwheat flour capacity:** 1,200 cwts; **total mill grain storage capacity:** 450,000 bus.
Number of mills: 3. Mills at Auburn, Cohocton, Penn Yan, New York.

President and chairman — Wayne W. Wagner
Vice-president — Cliff Orr
Treasurer — Jeffrey Gifford
Secretary — Donald L. Stork

Brands: Prize, 1st Prize, Larrowe's, Wolff's, Puritan, Morning Delight, Tyoga, AA, Bessie, Special Cake, Pocono.

CARGILL FLOUR MILLING DIVISION

(Cargill, Inc.)

15615 McGinty Road West. (P.O. Box 9300) Minneapolis, Minnesota 55391. (55440 for P.O. Box) Phone (612) 475-7575.

Total wheat flour capacity: 128,000 cwts (includes 5,000 SWF, 2,000 WWF); **total rye flour capacity:** 1,300 cwts; **total durum capacity:** 6,000 cwts; **total dry corn milling capacity:** 800 cwts; **total bulgur capacity:** 3,300 cwts; **total mill grain storage capacity:** 21,195,000 bus; **other grain storage:** 19,800,000 bus.

Number of mills: 12. Mills at Newton, Topeka (2), Wellington, Wichita, Kansas; Saginaw, Texas; Jacksonville, Florida; Port Allen, Louisiana; Albany, Buffalo, New York; Chattanooga, Tennessee; Culpeper, Virginia.

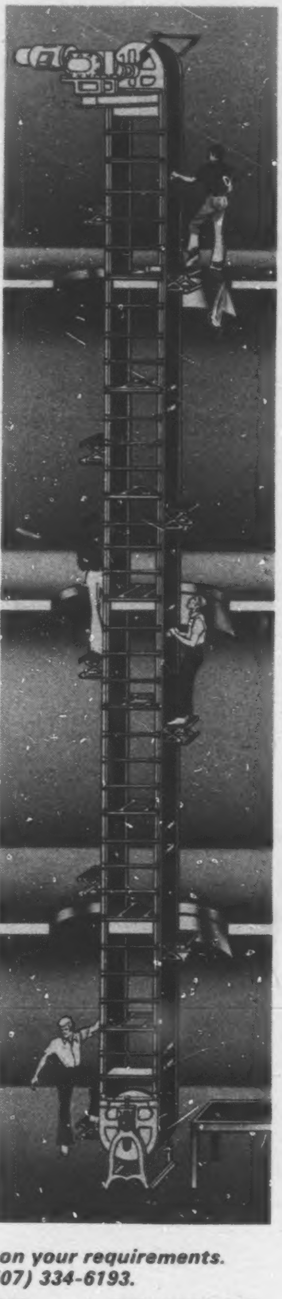
Family flour brands: Silver Mist, Robin Hood, Velvet, Big Jo.

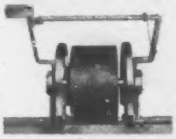
HUMPHREY
EMPLOYEES' BELT MANLIFTS

Production goes up when a Humphrey Employees' Belt Manlift goes in. You save man-hours by eliminating stair-climbing time and fatigue. A Humphrey Manlift provides simultaneous up and down transportation, eliminates waiting and delays. It costs less to install and maintain than conventional elevators and takes only a fraction of the space.

Important SAFETY FEATURES of the **HUMPHREY** EMPLOYEES' MANLIFT



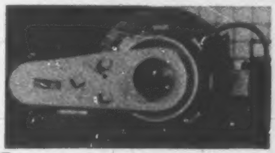
1. Roller limit switch safety stop device automatically stops manlift if rider forgets to get off on top floor. Tripped by weight of person on step.



2. Overhead limit switch safety stop device. If tubular bar is bumped by rider, limit switch is activated to apply brake and stop manlift instantly, preventing rider from going over the top.

3. Foot treadle limit switch safety stop device automatically stops manlift if rider fails to get off at bottom landing.

4. Optional movable safety cone hood for mounting beneath floor openings on up travel side of manlift. If bumped by rider, mercury switch is activated to apply brake and stop manlift instantly.



5. New electronically-actuated "Saf-T-Stop" brake stops overspeed in normal direction of travel. Proven roller holdback device prevents reverse travel. Greater safety than ever with this combination. Brake and holdback are extra-cost options, except where required by state code. Available for all new Humphrey belt manlifts and most existing Humphrey and Allis-Chalmers' Nordyke & Marmon manlifts.

Send now for quotation on your requirements.
Or telephone (507) 334-6193.

HUMPHREY ELEVATOR and TRUCK CO.

Manufacturer of the original employees' belt manlift, made continuously since 1887

In grand peroration
  in Washington fashion
A "Block" grant called PIK
  was to cure farmers sick.

But agricultural asseverations
  turned confused explications
while inaccurate expectation
  created budget inflation.

Bureaucratic articulation
  creates long term vacillation
So get politicos out;
  Let ubiquitous drought.

Rule yield & fortune & stock.

since 1882
SIEMER
MILLING COMPANY

A NEW CENTURY OF QUALITY

It's trite but true that experience is the best teacher. In our first one hundred years of flour milling, we know that we've learned a lot.

We produce soft wheat flour—for cakes, cookies, crackers, pretzels, batter, and breading.

We believe that our products, including New Century Hi Ratio Cake Flour and Gold Standard Cookie and Pastry Flour, adhere to a standard of quality that should be every miller's goal.

When consistent product and reliable service are important to you, think of us. We've learned what it takes to keep our customers satisfied. . .and we're doing better every day.

Now is the time for NIR.

Pacific Scientific's 102 NIR Analyzer puts you in control— Now you can measure protein, moisture, fat and fibre in just eight seconds.

Using today's Near Infrared (NIR) technology, the same NIR technology used by the USDA to measure protein in wheat, the 102 gives you instant, portable, on-site grain and flour analyses. You can segregate incoming grains on the spot, control production, maintain quality control over finished products, and meet government, industry and customer standards. You know what you're buying—you know what you're selling. THAT'S CONTROL.

Factory calibrated, the 102 comes with an unprecedented two-year warranty that tells you it's built to last. Its patented Advanced Spectral Transformation Scanning System automatically compensates for particle size, moisture and crop year differences. This means no recalibration problems for the user.

For more control—interface the 102 with a Pacific Scientific Microprocessor Terminal and get unlimited calibration files and increased calculating abilities.

For a demonstration, call Pacific Scientific today, toll-free at (800) 638-2790.

Improve product yield and quality, with rapid payback...

The H₂O-KAY™ automatic grain tempering system.

Optimum kernel conditioning requires quick, uniform moisture distribution. The Technovator® Grain Tempering Mixer applies water uniformly by generating a high degree of surface contact between kernels. It out-performs traditional hydrating methods. The Kay-Ray® Automated control system provides accurate, on-line measurement and control of tempered grain moisture and temperature.

Result? Improved yield and higher quality.

Flour millers report rapid payback as a result of the immediate improvement in product yield that they receive with the H₂O-KAY™ Grain Tempering System.

Contact Bob Gies for our brochure, and ask him about our free H₂O-KAY ROI Survey...Return on Investment is frequently less than six months.

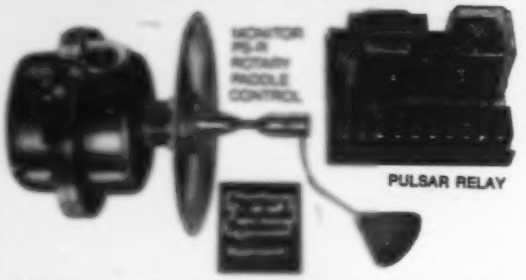
REAL
BIN LEVEL CONTROL



Mechanically and Electrically Fail/Safe

All the protection you'll ever need in a Rotary Paddle Control with Pulse Switch. Why? Because it's continuous ...always determining the level and flow of material in and out of bins. And, because it warns you...instantly...by setting off alarms, lights or interlocks if something goes wrong.

If your PS unit is joined with our Monitor Pulsar Relay, all controls are handled through the relay...and that means easier installation because only a 4-wire cable is needed. It's modern...it's the most advanced, fail/safe unit on the market...it's able to do what only far more expensive units have done in the past. From Monitor to you: Affordability.

Write for catalog of detailed facts.

WHAT MAKES A GREAT MILL TODAY.

Quality sells. But only when quality is consistent.

At Morrison Milling, we know that institutional and home bakers alike depend on the quality and fresh, delicious flavor of Morrison's many fine flour and corn meal products.

We know that customers big and small look to us for that old-fashioned, prompt and personal service that's become rare in the marketplace today.

Our customers have come to expect the best from us. And they know we never forget it.

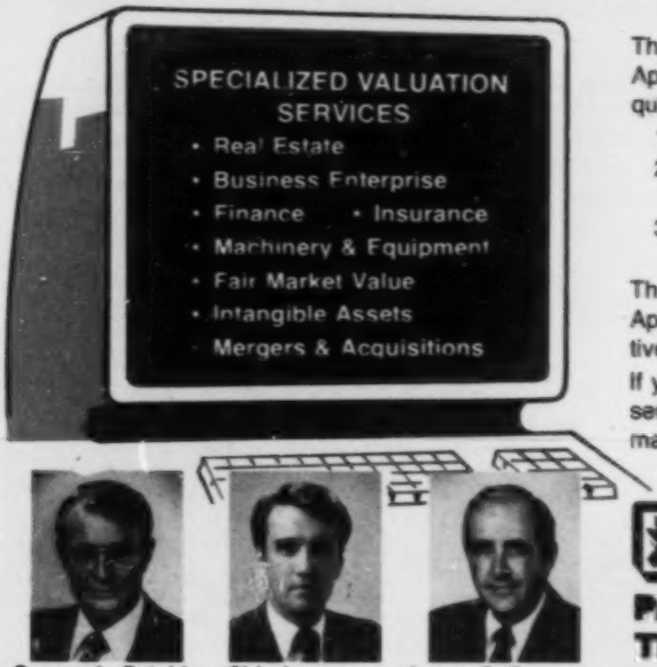
Good Value Judgements DEPEND UPON THE QUALITY OF THE INPUT



George L. Patchin Chip Longacre James C. Ferguson

That's why it pays to work with a FULL SERVICE Appraisal Company that can meet all of these requirements:

1. Is it fully staffed with appraisal specialists?
2. Does it have in-depth people and data resources upon which to draw?
3. Is it geared up to provide both local and nation-wide service?

The Patchin Appraisals Division and the American Appraisal Co., founded in 1952 and 1896, respectively, proudly answer "yes" on all three counts.

If you are in the market for a specialized appraisal service, we'll be glad to supply you with more information.

Call us at 612/835-6531

PATCHIN APPRAISALS DIVISION
THE AMERICAN APPRAISAL CO.

1985 MILLING DIRECTORY/BUYER'S GUIDE

This 1985 Milling Directory/Buyer's Guide comprises two sections. The first is a continuation of the Directory of Milling which had its beginnings more than half a century ago and has been published by *Milling & Baking News* since 1973. The second is a Buyer's Guide of milling equipment and services, first published as a separate directory by *Milling & Baking News* in 1978.

The Milling Directory provides a comprehensive listing of companies and products in the milling industry, including daily flour milling and storage capacity, railroad service, executives in management and production, and wholesale and retail brands. The statistical summaries beginning on Page 6 detail milling capacity by largest companies, by states and by type of flour. An alphabetical listing of milling companies begins on Page 118; an alphabetical listing of milling executives begins on Page 124.

The Buyer's Guide includes a complete listing of products and services for milling and an alphabetical list of companies producing and/or supplying these products to milling. Suggestions on how to use the Buyer's Guide appear on Page 75.

This Milling Directory/Buyer's Guide is unique in that each and every listing is verified by the companies listed for accuracy. Every effort has been made to present a publication free of errors and/or omissions. In the event that errors or omissions occur, the editors of *Milling & Baking News* would greatly appreciate communications to that effect so that corrections will be made in future editions.

UNITED STATES
Statistical Summaries

The 1985 Milling Directory of *Milling & Baking News* lists a total of 229 U.S. wheat flour mills, 16 durum mills and 10 rye mills. The wheat flour mills have total daily milling capacity of 1,105,541 cwts. This aggregate includes 797,226 cwts of hard wheat flour, 266,161 cwts of soft wheat flour, 25,530 cwts of whole wheat flour and 16,624 cwts of applicable alternating capacity. Alternating capacity is shown in parentheses in the table below. Daily durum milling capacity listed in the directory is 86,500 cwts, with an additional 10,200 cwts of durum capacity alternating with wheat flour. Combining the wheat flour milling capacity of 1,105,541 cwts and the durum milling capacity of 86,500 cwts results in a wheat flour-durum aggregate of 1,192,041 cwts. Adding the 9,104 cwts of rye flour milling capacity in the directory brings aggregate of wheat flour-durum-rye capacity to 1,201,145 cwts.

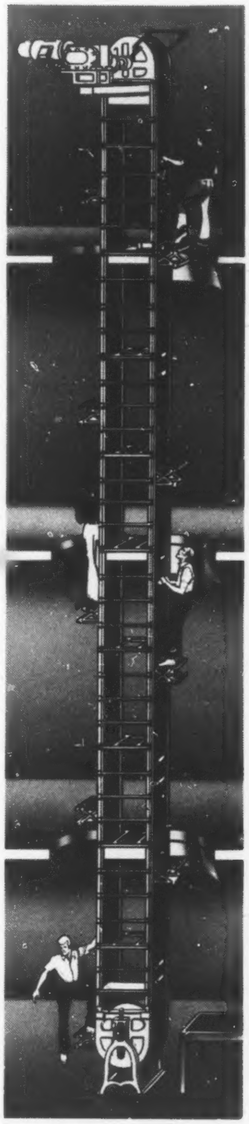
HUMPHREY
Employees' Belt Manlift

Production goes up when a Humphrey employees' belt manlift goes in. You save man-hours by eliminating stair-climbing time and fatigue. A Humphrey manlift provides simultaneous up and down transportation, eliminates waiting and delays. It costs less to install and maintain than conventional elevators and takes only a fraction of the space.

Important SAFETY FEATURES
of the **HUMPHREY**
Employees' Belt Manlift

1. **In-track safety stops.** They break the electrical circuit, applying the magnetic disc brake to stop the manlift, if a rider fails to dismount at the top landing. Also furnished at bottom of manlift when a pit is required.
2. **Overhead safety stop** at the top of the manlift breaks the electrical circuit, applying the magnetic disc brake to stop the manlift, when tubular bar is dislodged by a rider.
3. **Foot treadle safety stop.** Available for mounting at bottom of manlift. It breaks the electrical circuit, applying the magnetic disc brake to stop the manlift, when rider steps on treadle board.
4. **Fixed or moveable safety cones** for mounting beneath floor openings on the up-travel side. The moveable type is equipped with a switch that breaks the electrical circuit, applying the magnetic disc brake to stop the manlift, if cone is bumped by a rider.
5. **Start-stop control rope** is always available to riders on both the up and down sides of the belt. Manlift can be stopped by rider at any point by pulling the control rope in the direction of travel.
6. **All Humphrey manlift belting** is tested and certified for manlift service.
7. **Magnetic disc brake,** mounted on motor shaft extension, is applied upon loss of power to motor.
8. **Centrifugal force-operated "Saf-T-Stop"™ brake or electronically-actuated "Saf-T-Stop"™ brake with safety hold-back** are available where required by state or provincial codes. They are always available as extra-cost options.



Drive support, guard rails and gates are not shown for simplicity in depicting the belt manlift.

Send now for free catalog and request a quotation.

HUMPHREY ELEVATOR & TRUCK CO.
700 Morristown Blvd., Faribault, MN 55021
Telephone: (507) 334-6193 • CABLE: HUMELEV

Manufacturer of the original employees' belt manlift, made continuously since 1887. Also maker of baglifts.

THE AGRICHEM
TROUBLE-SHOOTER

PHIL SCHAMBERGER — PRESIDENT

Last seen traveling through Africa, the Orient, South America, the Caribbean... and now the United States. He is bringing with him a wealth of experience.

His specialty is improving your flour quality with optional contracts or direct purchase...the choice is yours. He can also help with that occasional problem of inferior wheat.

AgriChem, Inc. is a leading exporter and supplier of flour additives, including:

AGRIMALT (Fungal Amylase)
MATURAG (Maturing Agent)
VITAG (Vitamin Enrichment)
BROMAG & BROMAG 50 (Potassium Bromate-23-50%)
AGRILITE (Bleach)
AGRICOM (Custom Blended Combinations) also available:
GLUTEN PLUS & MODIFIED GLUTEN

He can also handle your infestation problems by supplying fumigants or help you design a complete program, including training your personel.

Call the AgriChem Trouble-Shooter today for all of your flour improvement or fumigation needs. Ask us about our *new* Agri-Chem ingredient feeder as displayed at the AOM show.

CONTACT US:

Improve product yield and quality, with rapid payback...

The H_2O-KAY™ automatic grain tempering system.

Optimum kernel conditioning requires quick, uniform moisture distribution. The Technovator® Grain Tempering Mixer applies water uniformly by generating a high degree of surface contact between kernels. It out-performs traditional hydrating methods. The Kay-Ray® Automated control system provides accurate, on-line measurement and control of tempered grain moisture and temperature.

Result? Improved yield and higher quality.

Flour millers report rapid payback as a result of the immediate improvement in product yield that they receive with the H_2O-KAY™ Grain Tempering System.

Contact Bob Gies for our brochure, and ask him about our free H_2O-KAY ROI Survey...Return on Investment is frequently less than six months.

CALL US OLD-FASHIONED.

At The Morrison Milling Company, our dedication to quality hasn't changed at all over the years. But that doesn't mean we're behind the times.

Our newly installed pneumatic milling system is state-of-the-art. It's helped Morrison meet the demands of a growing business. And doubled our mill capacity—without compromising quality.

Morrison's new ways of milling make our old way of doing business even better. Because at Morrison, being old-fashioned is a quality that never goes out of style.

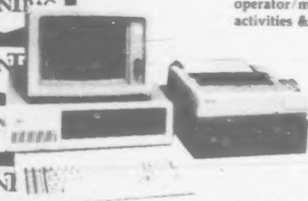
More reasons why GrainTrac has become the software solution for grain elevator management;

- Complete grain contract maintenance - purchase, safe, & hedge, with enough information to satisfy merchandising.
- Scale ticket processing - purchase & sale. Enough flexibility to handle daily situations - split loads between 9 customers, establish different spot prices for each load; establish storage rates for each load, & more.
- Daily application report - allowing operator/management to preview day's activities & correct any mistakes.



- A discount schedule system so flexible that a simple grade factor, a combination of grade factors, or all grade factors can be averaged for a business day or a period of time.
- A daily position report that is designed with each client. GrainTrac wants to adapt to your operation, not vice versa.
- Settlement reports that are organized with the customer in mind. When the customer understands the settlement sheet, you spend less time explaining.
- A warehouse receipt system that is hassle free.
- In general, a software system that provides the necessary tools so that office help can process daily activities in an efficient manner & management can analyze, instead of put out fires.

For more information on GrainTrac please call 309/688-2377
